

view/include/view/PauseState.h

```
graph BT; A[view/src/LevelState.cpp] --> B[view/include/view/PauseState.h]; C[view/src/PauseState.cpp] --> B;
```

The diagram illustrates a file dependency structure. At the top is a header file, `view/include/view/PauseState.h`, enclosed in a gray box. Below it are two source files: `view/src/LevelState.cpp` on the left and `view/src/PauseState.cpp` on the right, each in a white box with a black border. Two blue arrows point from the source files up to the header file, indicating that both source files include the header file.
